The Reporter

A GALLUP POLL conducted recently disclosed that 57 per cent of the American public think a newspaper reporter should not be required to disclose his confidential sources, while 34 percent think he should. What side of the percentage scale some members of the Jefferson Elementary School District School Board and Personnel Commission support can only be guessed at. Frankly, we've got our own opinions.

COME JANUARY I, we're gonna change. There'll be no more of those columns in which we point arthritiel fingers of suspicion at politicians who live high on high galavanting all over the country and chandal at our expense supposedly for our good.

While we were pointing, the general public was ugging it off, while the junketeers laughed it up. No. nks.

The way we intend to look at it in the future is s nply; You get what you pay for. And the price we seem to be paying for our politicians (and some of their staff members) is mighty stiff. So high, in fact, we must be getting the best. But of what?

WEVE JUST LEARNED the court has issued a rather lengthy (two paragraphs or so) opinion on that Beve'y Forrester-Edward Tomasello suit over elleged conflict of interest which was based on Tomasello being a supervisor at the city's Recreation Department and the JJESD handing over an annual sum of money to that department for specified recreation programs (plew that was one long sentence. Anyhow, the two trustees can now go to neutral corners following the judge's decision and come out slugging — on another matter.

Citizens Boards at Work—here is a book by Pro-fessor Harleigh B. Treckner that should be widely read.

Noting that boards operate in the fields of educa-tion, welfare, health, recreation, youth services and others, the professor writes that the public expects a board to be a leadership team.

always brought to bear in solving the problems of the community.

This requires cooperation among the members of the board. Let each of them realize that the public expects board members to let old vendettas and tensions sink into the background and adopt in their stead an atmosphere that Professor Treckner calls "a courteous, genfrous and casual one, up to no bullying tricks... also capable of humerous as well as earnest insights."

In a section of Citizen Boards at Work the professor lists seven concepts that are necessary for "a pattern of cooperative activity.

1—The Concept of the Work Group:

"Community services are carried on by groups of people working together to solve problems to make decisions, to establish legislation, to create policy, indetermine needs, to develop programming these community groups and others. Each group, whether it be regular or special, has authority, responsibility and limits."

The various work groups mentioned above require leadership if they accomplish their assigned tasks. All of them require he efforts of people parried larly prepared and particularly and get them done.

3—Concept of the Leadership Team:

"The most usual team consists of the professional worker and the lay or volunteer worker. By this is meant the chairman of the board of education and the superintendent of schools (for example). In fact, the way the professional executive and the board president work together does much to set the tone for the entire organization.

4—The Concept of Structure:

"Out of the continuous relatedness and communication of the work groups comes the totality of the agency or organization.

5—The Concept of Time and Timing:

"Each session of the work group produces a produce anomplished before."

"The task of providing the impetus for this coordination and the mechanisms for its occurrence is a primary one in the portfolio of the board president and texecutive."

"The Concept of Reporting Decision Making and Implementation:

"As the many work groups carry forward their endeavors it is necessary to prepare reports for transmittal of the parent authority. Then decisions must be made and plans prepared for the implementation.

Arthur Hiller, producer and director of the film version of "Man of La Mancha." came onto the United Artists' project late in the game and had to shoulder a 59 million dollar budget he hadn't incurred or expected as his first musical effort. Main Politics Is President

There are many reasons for this: the presidential race is the only national election we have, all others being confined within states or districts. In a government of coordinate and equal branches, the federal executive department is plainly more equal. THE SHADOW KNOWS — Lots of hush hush on that metertainment in front of the Serra Bowl on Junipero Serra Boulevard in Colma about five weeks ago. What do we mean by "apprehended" 'You figure it out, We haven I heard whether legal action is contemplated.

Seems the DA told Ottoboni those cards are a definite no-no and to cut it out, right now! South San Francisco police instigated the opinion from Sorenson after questioning a man during a traffic stop who insisted they honor the card.

PETE MARKOVICH ASKED us to give Operation Sanucl'an s a plug in this column. We read and re-read Pete's letter and decided to let him tell you about this most worthy endeavor. Here 'tis:

"Dear Frank Regarding Operation Santa Claus. I will leave it to your discretion. You always have tha knack for convincing people the importance of this

affair.

"Getting back to last year, we took care of 283 families with 1014 youngsters which was an increase of 80 additional families from the previous year. Heaven only knows what is in store this year.

"Being that the Marines will not collect from the schools will add an additional burden, however, in order to pickup where the Marines left off, we are hoping the local residents will buy a new toy and deposit it at the fire house nearest to them. The Fire Dept has already started to work on some of the wheel toys and the recreation dept, will shortly start their canned goods drive.

"The Operation Santa Claus Committee hopes again to make this year's affair a happy one for all those less fortunate."
